SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

Verified magnitude 7.8 earthquake, 32 miles Northeast of Amberley, New Zealand

At 0303 hours Pacific Standard Time (PST) on 11/13/16, an earthquake occurred 32 miles Northeast of Amberley, New Zealand with a preliminary magnitude of 7.4, later verified at a 7.8M occurring 14.3 miles deep. There have been many aftershocks ranging between 6.2M to 4.9M.

- The Cal OES Earthquake and Tsunami Program (EQTSU) Duty Officer consulted with representatives from the California Geological Survey and National Tsunami Warning Center until California was determined to be clear of any tsunami threat. The EQTSU Duty Officer will continue to monitor and advise as needed.
- At 0551 hours the National Tsunami Warning Center issued a Tsunami Information Statement confirming there was no tsunami threat to California.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

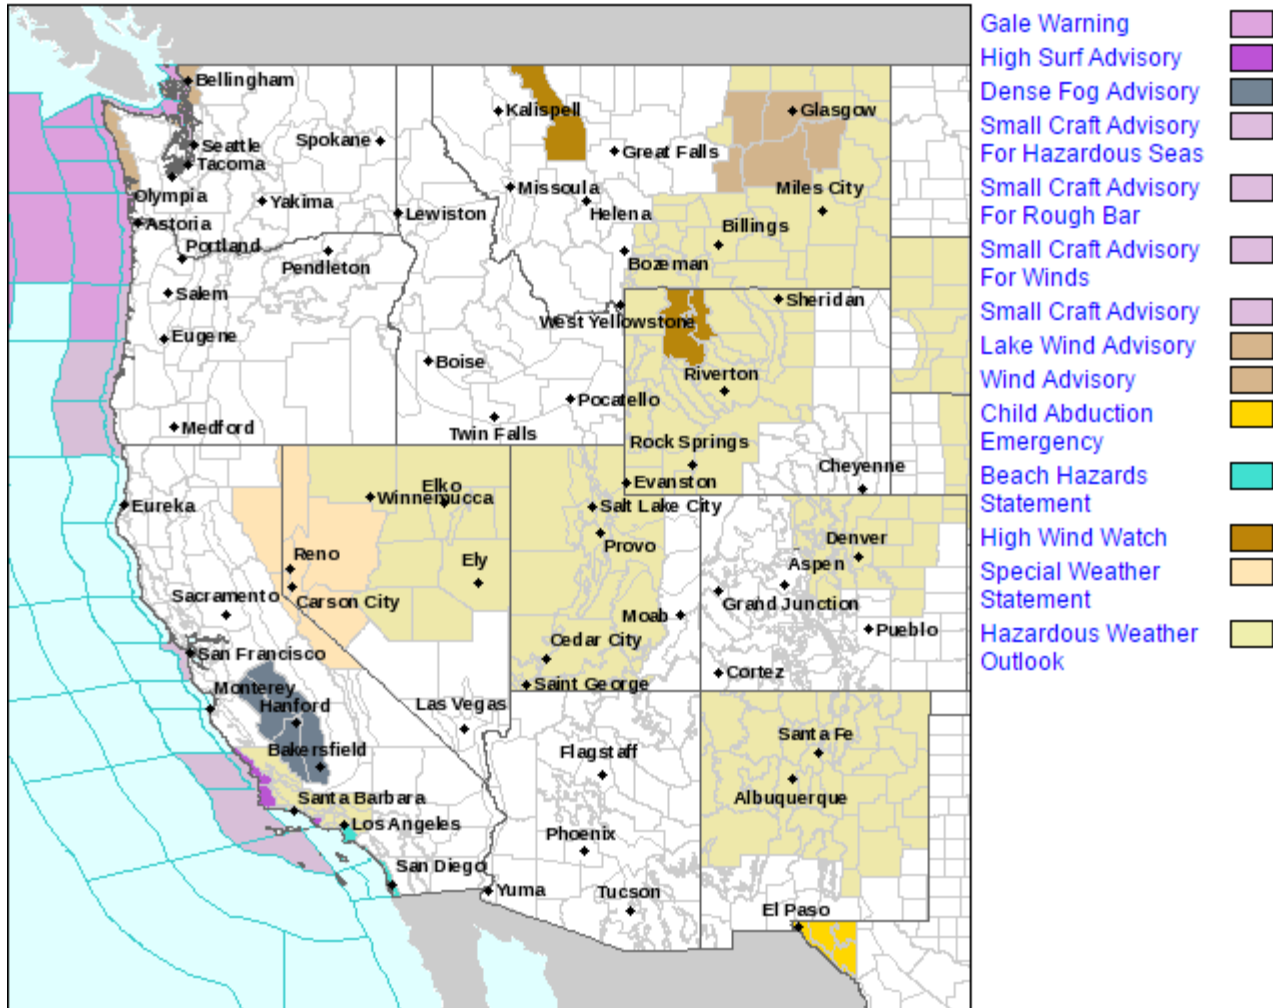

NORTHERN CALIFORNIA

Weak high pressure will bring dry conditions. A cold front will bring another chance for rain Monday into Tuesday and much colder interior temperatures mid week. Dry and mild weather will continue through Monday night with patchy Valley fog in the mornings. A weather system will move through later Tuesday into Wednesday, bringing cooler temperatures, light Valley rain, and mountain snow down to 4000-5000 feet. Forecasts have trended drier over the past few days so only a few inches of snow accumulation is expected at this time near pass levels. A stronger cold front will bring more rain and gusty south winds on Friday and Saturday.

SOUTHERN CALIFORNIA

High pressure will strengthen aloft through Monday with high temperatures 10 to 20 degrees above normal. Well above normal temperatures and mostly clear skies are expected through Monday due to high pressure aloft and weak offshore flow. A significant cooling trend will begin on Tuesday as a trough of low pressure approaches, with below normal temperatures for mid-week. Cooler Tuesday through Thursday as a trough of low pressure moves inland along the West Coast. Temperatures may return to near normal by late next week as high pressure returns.
